

COALA FERRO WHITE BASE ADHESIVE

MATERIAL DESCRIPTION

Coala Ferro White Base Adhesive is used to make a non steel/iron surface suitable for easy-to-replace magnetic graphics. The white surface base films are ideal for areas where the wall is not always covered with graphics. This white PVC layer can also be printed with UV-cure inks. Due to the weight, large panels should be securely fixed at the top either by staples or HT double sided tape.

PRINTER & INK COMPATIBILITY

FEATURES

- Flexible ferrous base
- Bright white PVC surface
- Easy to re-position
- Compatible with UV-cure inks
- Acrylic adhesive
- Indoor and static outdoor use

APPLICATIONS

- Indoor retail advertising
- Interior decoration
- Trade show graphics
- Boards

SHELF LIFE STORAGE AND CONDITIONS

- 1 year under normal conditions (+15° to +35°C at a relative humidity between 30% and 75%. Higher humidity and/or temperature can affect the product performance. Always store the media in a dark place in its original packaging.

THICKNESS

500 μ

WEIGHT

1880
g/m²

HOLDING

STRENGTH

100
g/m²

MOUNTING

- Vertical mounting is the best method, horizontal mounting will result in a lower holding force.
- Draw a vertical line on the mounting surface to align the first panel vertically.
- Remove the release liner from the ferro base film.
- Apply the ferro base film to the mounting surface with a squeegee, starting at the top, from the center to the sides.
- Mount the second panel, panels should not overlap. Leave a 1mm gap between the panels to allow thermal expansion.
- Do not stretch the material during mounting.

It is recommended to use saddle stitching to fix the edge of large ferro panels.

The following technical details are issued to the best of our knowledge, however, without any responsibility for results due to several different kinds of material and application processes. Therefore, we highly recommend that before every usage a test should be conducted on the original material. Antalis cannot be responsible for any damage to the printer caused by printing our media.
