Polyart Laser Food

Polyart®, recognised as the brand leader in synthetic papers, has designed a new and unique **direct food contact synthetic paper** for dry toner printing.

Benefits

This new range combines all the benefits of Polyart Laser and is also food contact compliant.

Food compliant

Can be used in direct contact with food, according to:

- The European directive n° EU 10/2011 for all food
- The Food and Drug Administration regulation FDA 21 CFR 177.1630

High resistance to

- Water, humidity
- Grease
- Tearing and repeated handling
- Outdoor exposure

Unique paper feel

Excellent print quality

- Anti-static coating
- Excellent toner anchorage
- Good opacity for duplex printing
- Writable with a pen

Typical applications:

Tags & labels for refrigerated food,

food products (fruits & vegetables),

seafood, fish...

Signs for fresh products
